

Project Proposal Presentation: Stock Prediction

1073716	黃怡晴	group 7
1073736	陳佳鈞	group 7
1073738	彭琪元	group 7

Criteria	Score (10)	Evaluated
What is your project about? Why is it important (Motivation/ Problem Statement) ?	2	2
How will you do it (Models/Techniques)? Ps. At least 2 MLs and 1 DL Ps. You don't need to specify DL technique in this project proposal but in the final presentation, you should also include the results from DL model	1	1
How do you evaluate your model? What is the plan for doing the experiments?	2	2
What do you expect to find? (Expected results)	1	1
Why are your findings important? Who is your target user?	1	1
Datasets + Data Management + Data Visualization + Data Description (How well do you know the data)	3	3

Comments:

Methods: kNN, DT, RNN (→ add LSTM, GRU)

Datasets: Taiwan stock, US stock

(Open, high, low, close, adj. close, volume)

Acc: Over 80%
